Body momentum is a vector physical quantity that is a measure of body movement.

Impulse is an internal urge, a push to something, caused by nervous activity
causative agents

The cessation of movement means the ultimate degree of coldness. People are warm-blooded creatures, therefore, the impulse is reset

(impulse zero) is also motion. It is a reflection work on the process of zeroing here and now.

It is necessary to emphasize the importance of zeroing, because "You cannot pour water into a full glass."

This is one of the

fundamental principles of any changes. It is impossible to radically change life and rewrite it history on your sheet, if you act on the basis of the unfinished baggage of experience. Start conscious creation is necessary from zero.

The basis of my painting is the work of Michelangelo, who depicts David in a moment of triumph over the giant Goliath. A young man prepares to fight his greatest enemy. He is calm and focused, but his muscles are tense. This is a thought-provoking piece in which David symbolizes man's struggle with himself during the pandemic.

Series “Prsonality DNA”

idea is simple: do not create an Idol instead of Yourself, fill yourself with bright features of Personalities who have changed the world and are changing You. Put the puzzle of missing pieces together as you explore the vibrant canvases of Artist Yana Yank.

Since childhood, I have been researching interesting people who have remained in history. It is always interesting why we remember someone, and someone disappears in the archives.

Now, in our era of change, new heroes are emerging... Technologies, discoveries, innovations... It is curious how and whom the "history" of modernity will write down in its "notebook".

In fact, many factors that characterize the epochs, according to the principle of which the trace of the Personality remains .. and all my many years of research, university education as a historian), professional activity in Public Rilations, do not give an unambiguous answer ... I can be clever on this topic for hours, but feel better...

And which of the Personalities is of interest to you? Whose thoughts, ideas, character, discoveries, values inspire you?

If you look at the Personalities through the eyes of a modern person, one thing is invariable: those whom we remember and know surprised with their set of DNA, changed the course of history, manifested themselves to the world especially...

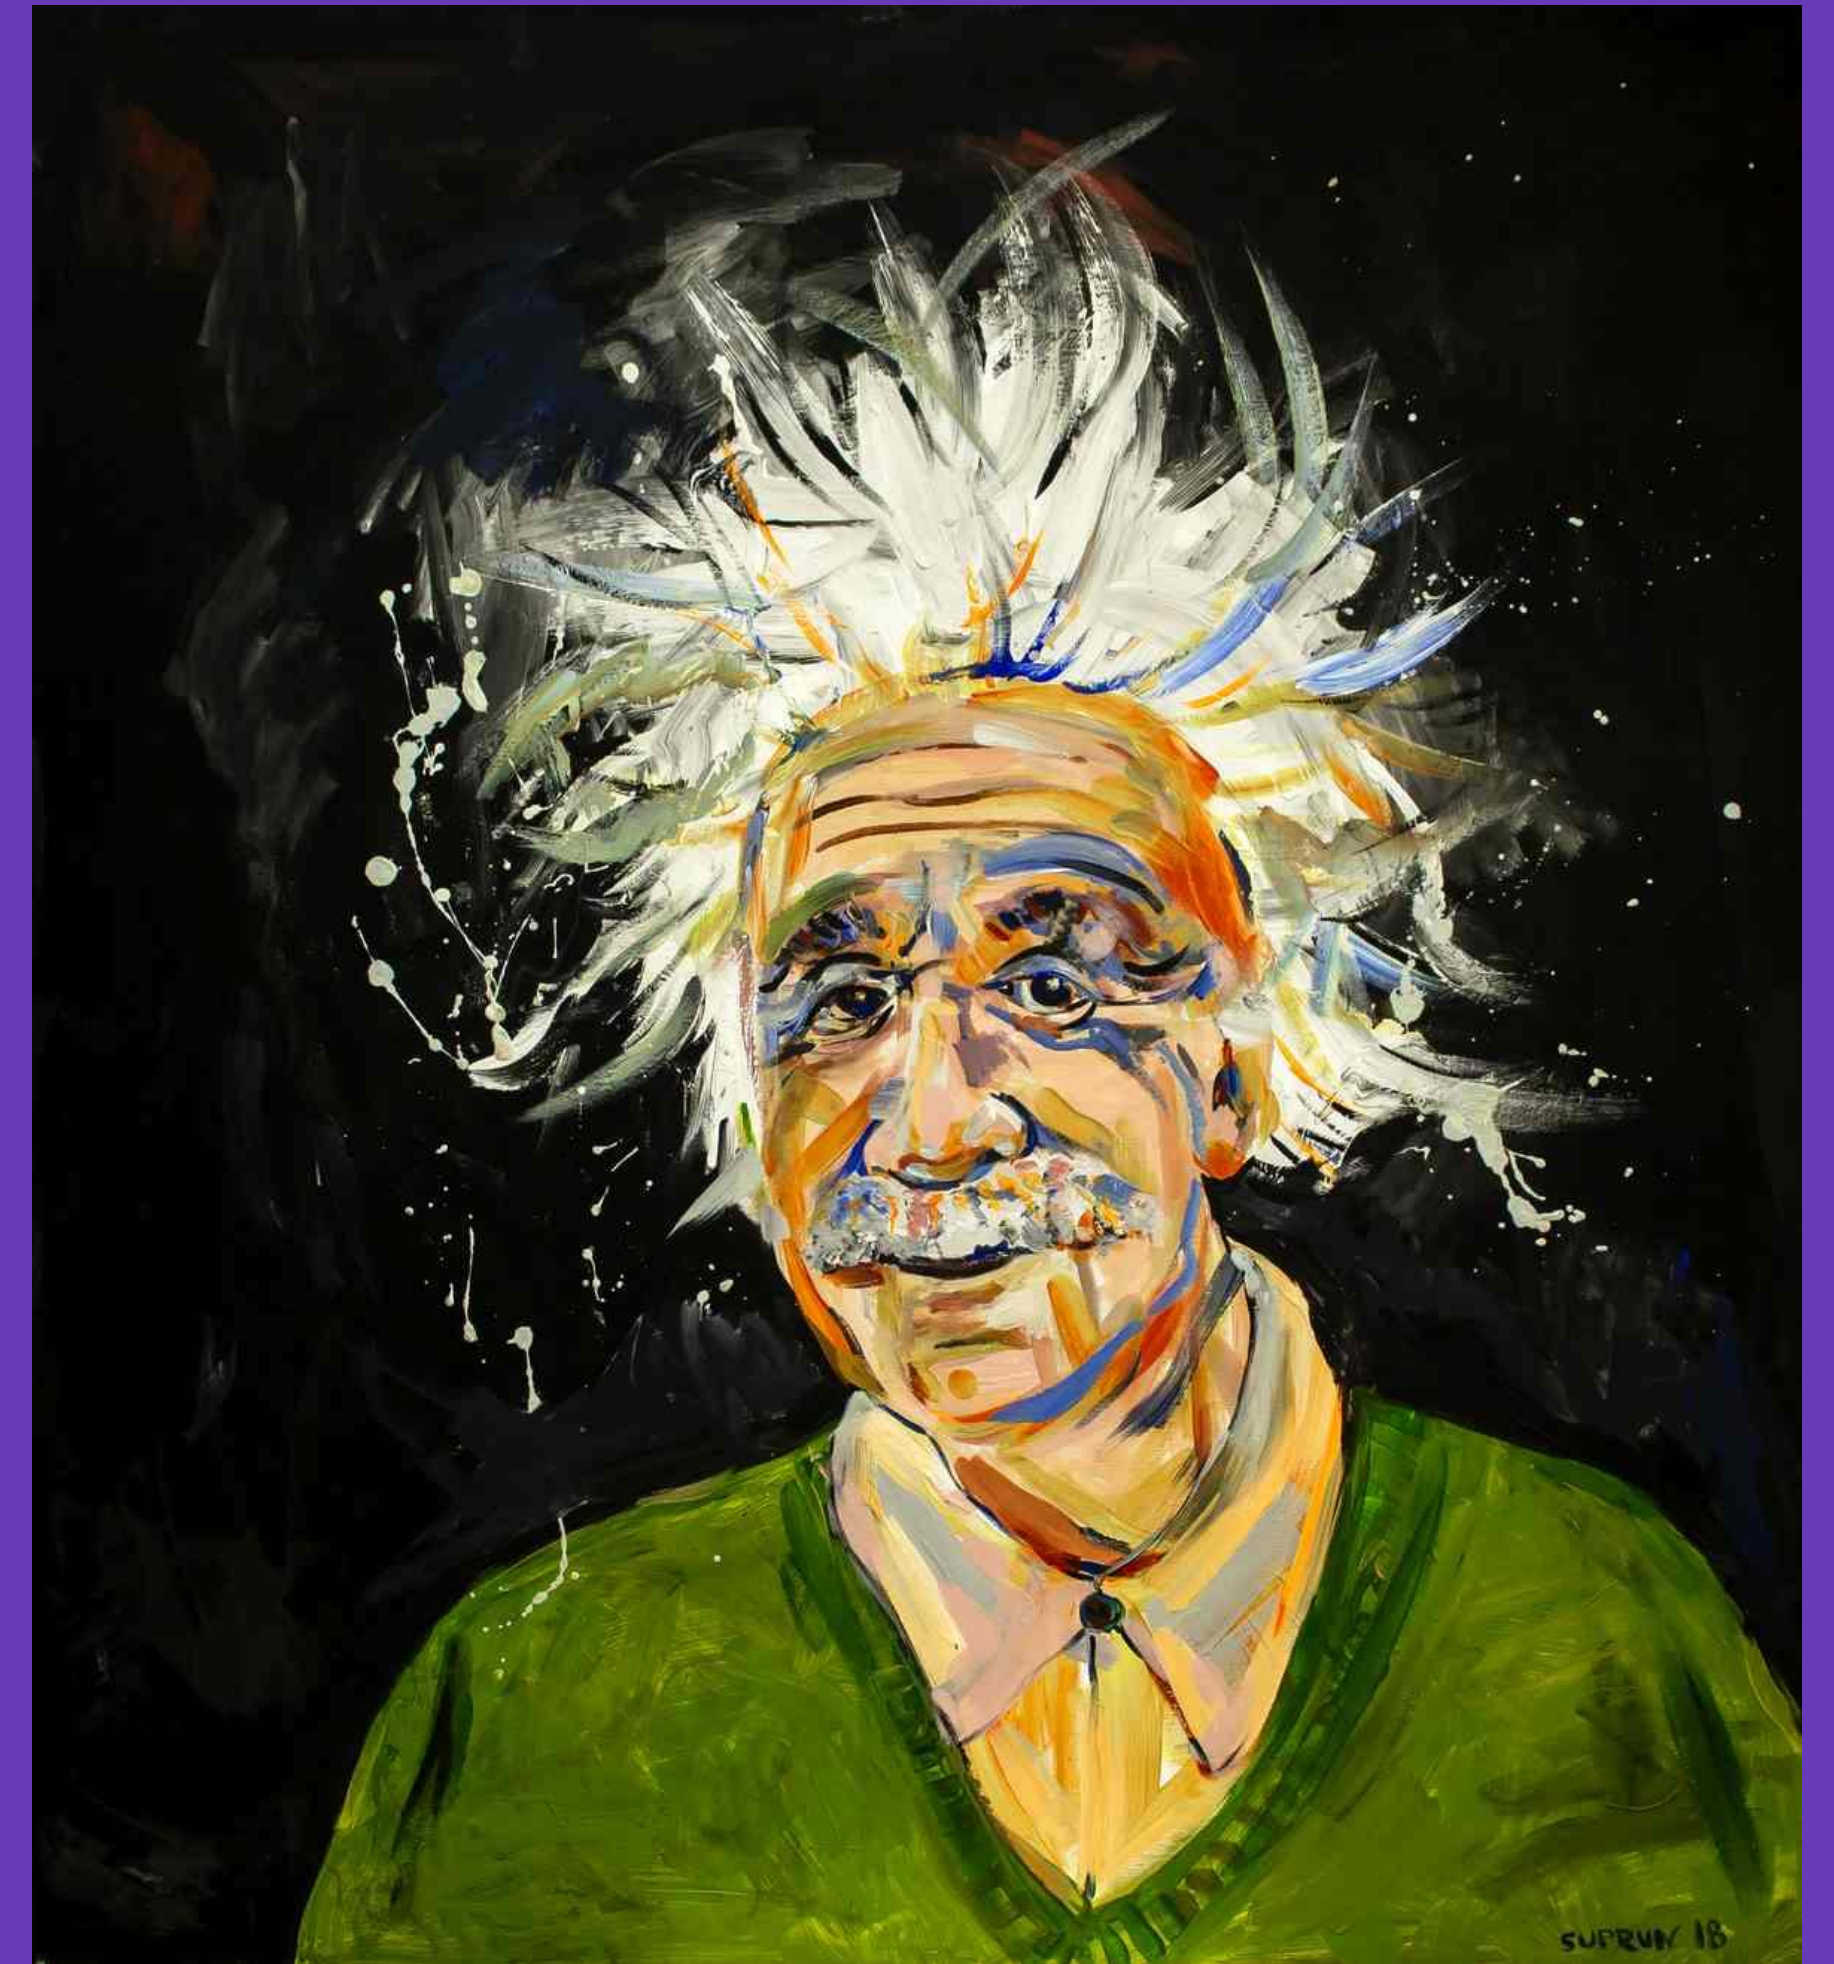

With a bright original handwriting, the Artist reveals the subtle features and facets of the Personality.

We know what they say about artists... "Not of this world..." What does "not of this world" mean?

"Not of this world" is a dreamer, a blissful person. my series of works written in the "pre-war period" "The Depths of the Sky" is filled with bright colors and positive. The roots of a person in astrology are characterized by the point Imum Koeli (lat. "Deep of the sky") Translated into the language of esotericism, the Depth of the sky is a portal through which the soul of a person comes into this world and leaves it. In it, a person finds the basis on which he builds his life. Something he can turn to at any moment in search of protection. I want my painting to convey the desire to live and enjoy life here and now.
